

"Good design is good business"

- Thomas J. Watson

# JITNEY<sup>®</sup>

## FORKLIFTS

# ECCONOLIFT<sup>®</sup>

### EXPERTISE

Every Jitney Forklift<sup>®</sup> is designed, built and supported by a team of dedicated and knowledgeable professionals, each with their own area of expertise. They all work together to deliver a forklift that is of superior quality both in design and function; Engineers, Product experts, ergonomists, and operators and mechanics all come together for one purpose – to bring our products out.

### EFFICIENCY

Jitney Forklifts<sup>®</sup> are manufactured using Six Sigma methodologies. Essentially, Six Sigma identifies and removes the causes of defects so as to minimize the "variability in manufacturing and business processes"

- Wikipedia: Six sigma

### EXCELLENCE

At Jitney Forklifts<sup>®</sup>, a commitment to continuous improvement and innovation is a clear indicator of our level of performance and operational excellence. It comes from applying the same patience and diligence to everything we do – from seemingly small tasks to large scale projects and investments, it gives us the shortest path from the factory floor to customers' satisfaction.

Compact design medium duty operation with a load capacity of 4400 lbs. Stable and economic, easy to move in confined spaces such as retail stores, small warehouses, trailers and factories.

Equipped with Curtis controllers for accurate smooth operation. Turtle speed functions moves slowly and smoothly to maneuver in tight spaces.

Maintenance free 24 volt battery.

Battery indicator, key switch and emergency off switch.

Turtle function feature

**Inexpensive Work Horse**  
**Productivity & Reliability**  
**Powerful Performance**

Emergency belly stop button and reverse

**1.844.938.4826**
